sets Exclaimer apart
from competitors

Why teams choose Exclaimer over Openseense

- ✓ **Certified security with full transparency**
SOC 2 Type II, ISO 27001/27018, Microsoft 365 certified with public Trust Center.
- ✓ **Simple to set up and manage**
Drag-and-drop editor and centralized branding controls.
- ✓ **Built for IT, powerful for marketing**
Role-based access with CRM targeting, campaign scheduling, and engagement tracking.
- ✓ **More capability, better value**
Broader functionality and global support coverage.

Most customers don't realize there's a better way until they see Exclaimer in action.

Exclaimer vs Openseense:

The key differences

	Exclaimer	Openseense
Security	SOC 2 Type II, ISO 27001/27018, Microsoft 365 certified, Trust Center, audit logs, 100/100 SecurityScorecard. 	SOC 2 Type II only. No ISO certifications or audit logs. 
Control & governance	Role-based access with centralized policies and audit visibility. 	No audit logs and limited delegation controls. 
Ease of use	Drag-and-drop editor with centralized branding. No HTML required. 	Complex setup and HTML-heavy design. 
Brand consistency	Brand Kits and dedicated disclaimer management give centralized governance of multiple regions, identities, and compliance requirements. 	Image repository only. No dedicated branding settings or automated disclaimer management. 
Marketing tools	Rotating banners, native analytics, CRM targeting, Campaigns workspace, Meeting Branding. 	Dynamic banners only. No rotation or Meeting Branding. 
Integrations	Strong Microsoft 365 and Google Workspace functionality plus integrations with platforms such as Salesforce, HubSpot, Okta, and Workday. 	Broad list, but often dependent on third-party tools. 

What sets Exclaimer apart

	Exclaimer	Openseense
Centralized brand control	Brand Kits lets teams define fonts, colors, icons, disclaimers and logos for multiple brands or departments. These can then be applied across all email signatures and video meeting themes. <input checked="" type="checkbox"/>	HTML templates and manual template edits increase IT effort and reduce brand compliance at scale. <input type="checkbox"/>
Campaign management	Dedicated Campaigns workspace enables advanced campaign management including banners, advanced targeting, and scheduled updates. <input checked="" type="checkbox"/>	Campaign tasks managed across individual templates with no central workspace. <input type="checkbox"/>
Banner testing	True rotating banners enable seamless A/B testing to compare performance over time. <input checked="" type="checkbox"/>	Dynamic and scheduled banners only. No automated rotation. <input type="checkbox"/>
Beyond email	Deploy branded backgrounds to Teams, Zoom, and Google Meet from one central interface. <input checked="" type="checkbox"/>	No meeting or video branding capabilities. <input type="checkbox"/>
Enterprise support	Global support teams, including U.S.-based coverage and onboarding specialists. <input checked="" type="checkbox"/>	Smaller support footprint with limited regional presence. <input type="checkbox"/>

The right fit for your environment

Exclaimer provides the governance, certified security, and operational control needed to manage email signatures across growing, security-conscious organizations without adding complexity or shifting risk back to IT.
