

# Stop *wasting* IT time on email signature admin

Simplify, automate, and scale email signature management with Exclaimer.

Still managing email signatures through mail flow rules, scripting, or end-user updates?

You're not alone—80% of organizations rely on patchwork processes instead of streamlined tooling.

But every new starter, role change, or branding update pulls IT away from higher-value projects.

Time-consuming tasks.  
Endless tickets. No control.

## Manual and repetitive tasks

- ✗ Copying templates between mailboxes
- ✗ Writing scripts or managing PowerShell
- ✗ Applying disclaimers one department at a time
- ✗ Fixing job titles and contact info after organizational changes
- ✗ Rolling out updates manually across the organization
- ✗ Reminding users (again and again) to follow formatting rules

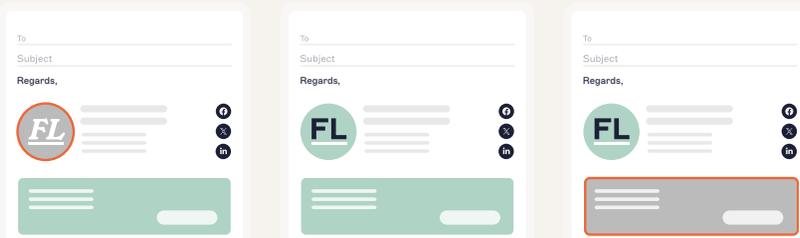

## Constant interruptions

- ✗ Support tickets for broken images, missing info, or mobile inconsistencies
- ✗ Pressure from Marketing or Legal to “fix it now”

## Lack of control and visibility

- ✗ No audit trail for signature changes
- ✗ No way to confirm who's using the right template
- ✗ Hard to troubleshoot across devices or regions

Unmanaged email signatures create hidden costs

✗ Outdated logo

✗ Incorrect fonts

✗ Outdated banner

# Take *control* in minutes— not hours or days

Without Exclaimer	With Exclaimer
✗ Manual updates	✓ Centralized management in one platform
✗ Reactive fixes and escalations	✓ Signatures apply consistently everywhere
✗ Endless support tickets	✓ Admin time freed up for higher-priority work
✗ No version control or audit log	✓ Full logging and change history built-in
